Cryptocurrency Wallet Tracker - User Guide

CIS 344 Group Project

Getting Started

The Cryptocurrency Wallet Tracker allows registered users to manage simulated cryptocurrency wallets and track their transactions.

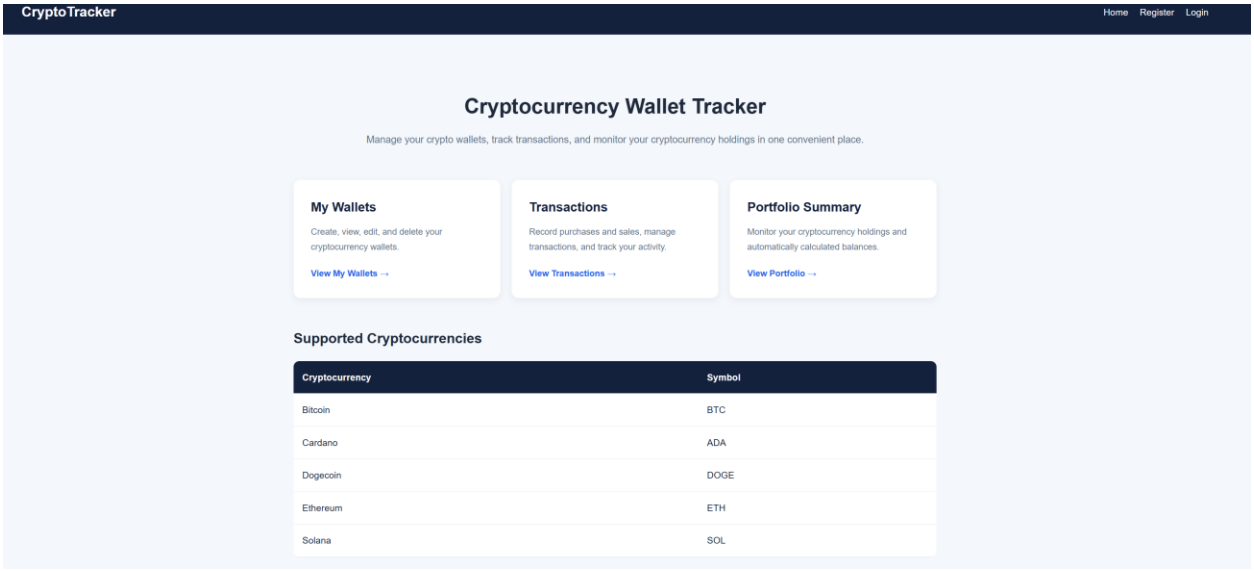

Step 1 - Open the Website

Start Apache and the configured MySQL server on the local computer.

Open a browser and visit:

http://localhost/crypto_wallet_tracker/

The homepage displays the application's main features and supported cryptocurrencies.

Step 2 - Register an Account

1. Click Register.

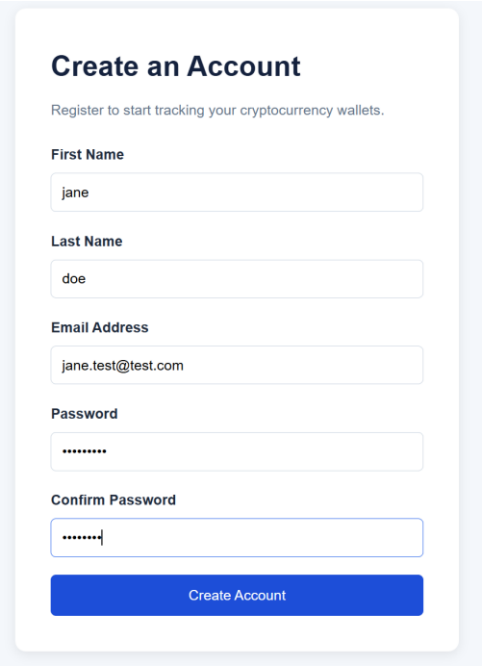

2. Enter your first name and last name.

3. Enter a valid email address.

4. Create and confirm your password.

5. Click Create Account.

After successful registration, the account information is saved to the database.

Step 3 - Log In

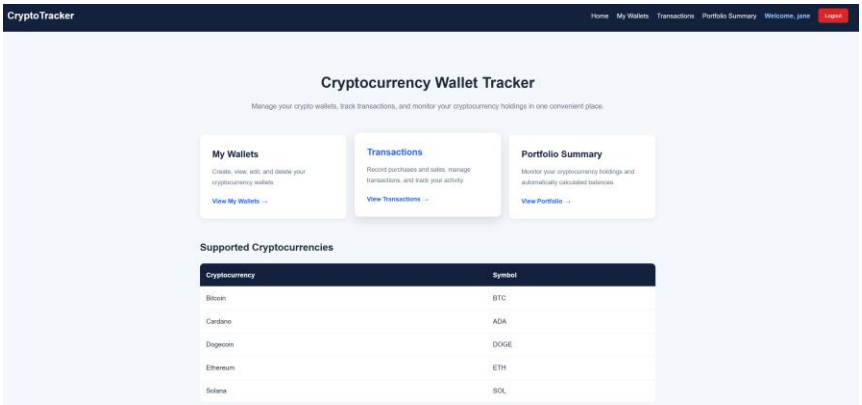

1. Click Login.

2. Enter the registered email address.

3. Enter your password.

4. Click Login.

After successful authentication, the application redirects to the homepage.

Step 4 - Create a Cryptocurrency Wallet

1. Select My Wallets.

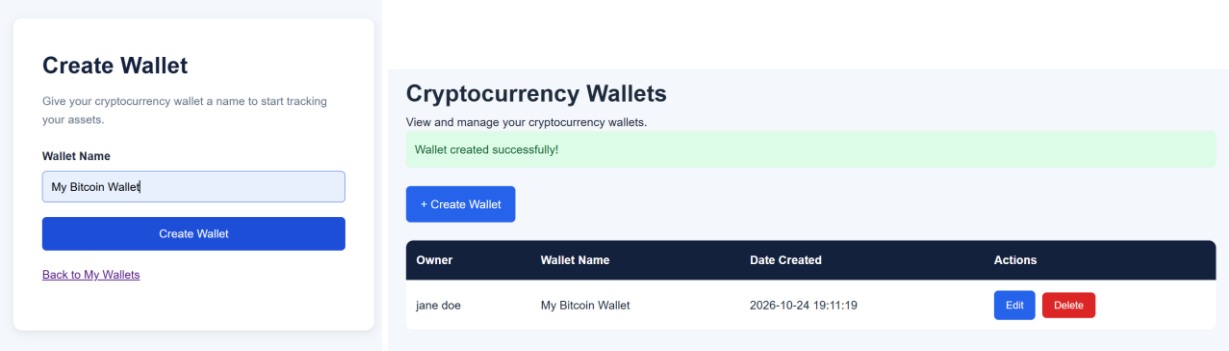

2. Click + Create Wallet.

3. Enter a wallet name, such as "My Bitcoin Wallet."

4. Click Create Wallet.

Your wallet will appear in the My Wallets table.

You can use Edit to rename a wallet or Delete to remove an eligible wallet.

Step 5 - Add a Cryptocurrency Transaction

1. Click Transactions.

2. Select + Add Transaction.

3. Choose one of your wallets.

4. Select a cryptocurrency.

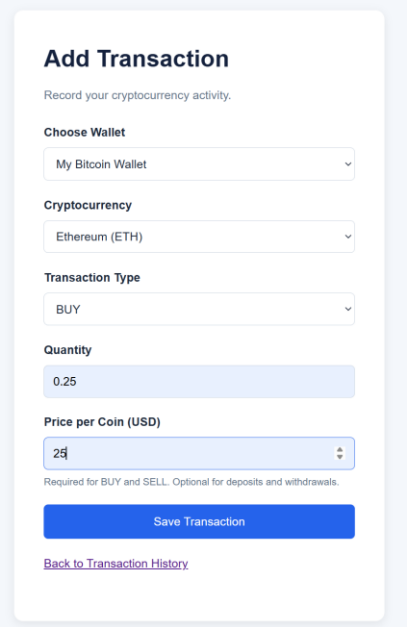

5. Select BUY, SELL, DEPOSIT, or WITHDRAWAL.

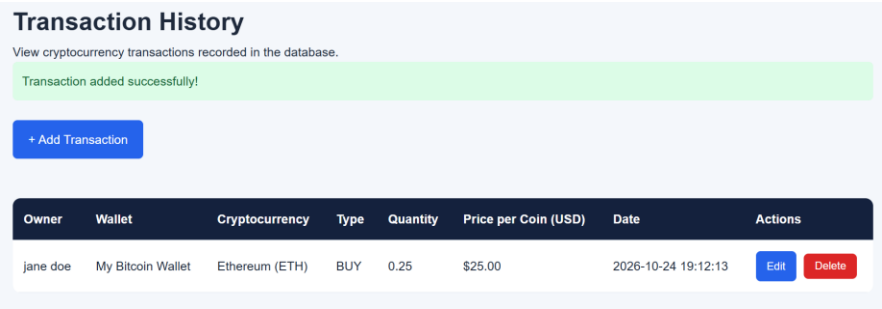

6. Enter the cryptocurrency quantity.

7. Enter a price per coin when required.

8. Click Save Transaction.

The new record will appear in Transaction History.

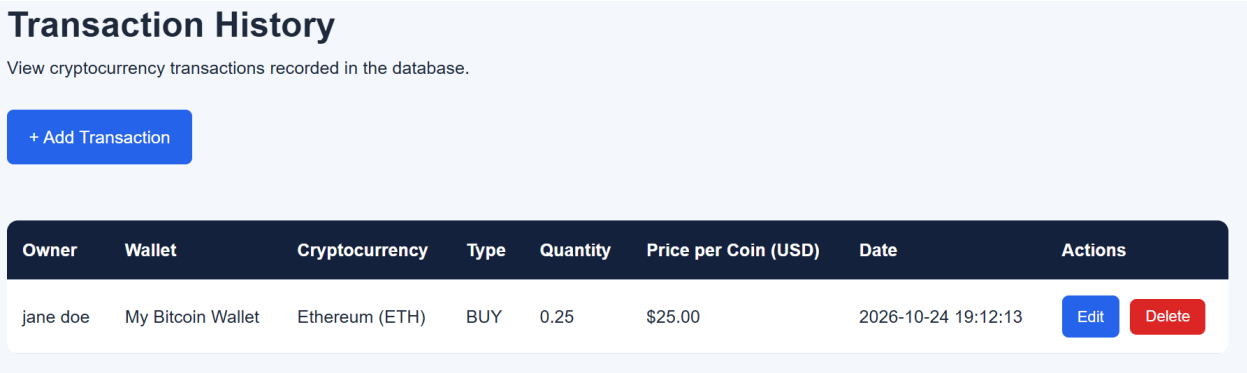

Step 6 - Edit or Delete Transactions

Open Transaction History and locate the desired transaction.

Select Edit to change the supported transaction details, or Delete to remove a transaction when permitted.

The application validates transaction changes to help prevent invalid cryptocurrency balances.

Step 7 - View Portfolio Summary

Click Portfolio Summary.

The page displays the cryptocurrencies associated with your wallets and calculates the quantity held based on recorded transactions.

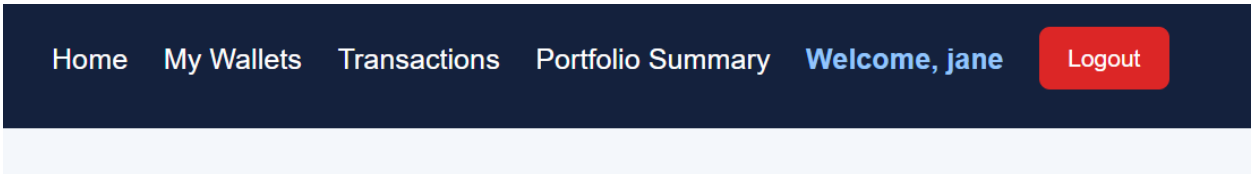

Purchases and deposits increase the balance, while sales and withdrawals decrease it.

Step 8 - Log Out

When finished, select Logout to end your authenticated session.

You will need to log in again to access protected account information.

Important Notes

- Cryptocurrency transactions are simulated and recorded manually.

- The application does not transfer real funds.

- A user can access only their own wallet and transaction records.

- Sales or withdrawals exceeding available holdings should be rejected.
